

Dalia Elhawati

Project Engineer

Dalia brings more than 20 years of architectural and project management experience to D+H Construction, with a background that includes leading design development, preparing construction drawings, and managing complex residential, commercial, and public projects for firms in Sudan. Her work spans conceptual design, estimating, scheduling, mentoring, documentation, and coordinating construction activities across a wide range of building types.

As a D+H Project Engineer, Dalia supports project teams through all phases of construction, assisting with plan and specification review, managing RFIs and submittals, maintaining project documentation, coordinating subcontractors, and helping ensure safe and efficient site operations. She applies her technical expertise, attention to detail, and collaborative approach to help deliver successful, well-coordinated affordable housing projects throughout the Bay Area.

3 Years of Industry Experience
