

# Marshall Snow

President

As a fourth-generation general contractor, Marshall brings a lifelong perspective to the industry. Raised around job sites, he developed an early understanding of how thoughtful planning, strong teamwork, and disciplined execution drive lasting project success.

Born and raised on the Big Island of Hawai'i, he gained a deep respect for community, craftsmanship, and relationships that endure. That foundation shapes Marshall's leadership philosophy—prioritizing integrity, accountability, and investment in people.

With a background in Urban Studies, Marshall brings a systems-level perspective to construction leadership, recognizing how buildings, infrastructure, and planning intersect with neighborhoods and economic vitality.

At D+H Construction, Marshall focuses on building a resilient, people-centered organization positioned for sustainable growth. He is committed to strategic planning, developing strong leaders, and scaling thoughtfully to strengthen the business. His leadership emphasizes operational discipline paired with a culture rooted in purpose and collaboration.
